
Car Sales Data Analysis

SQL & Power BI Dashboard · Data Analyst Internship Portfolio · April 2026

SQL | POWER BI | DATA ANALYSIS

Made with GAMMA

Project Overview

Goal

Derive insights on inventory, pricing, brand performance & customer demand

Tools

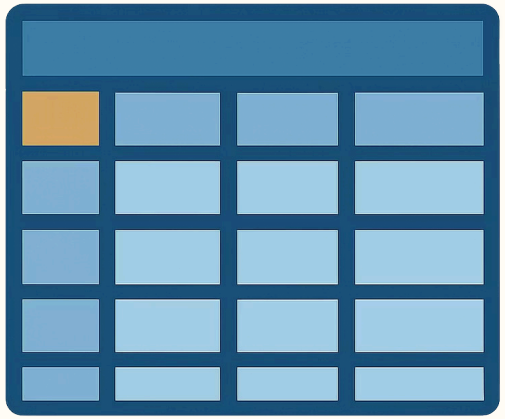
MySQL Workbench, Power BI, GitHub, Excel/CSV

Dataset

Car inventory: Brand, Model, Year, Engine, Transmission, Price, Status

Made with GAMMA

Data Cleaning

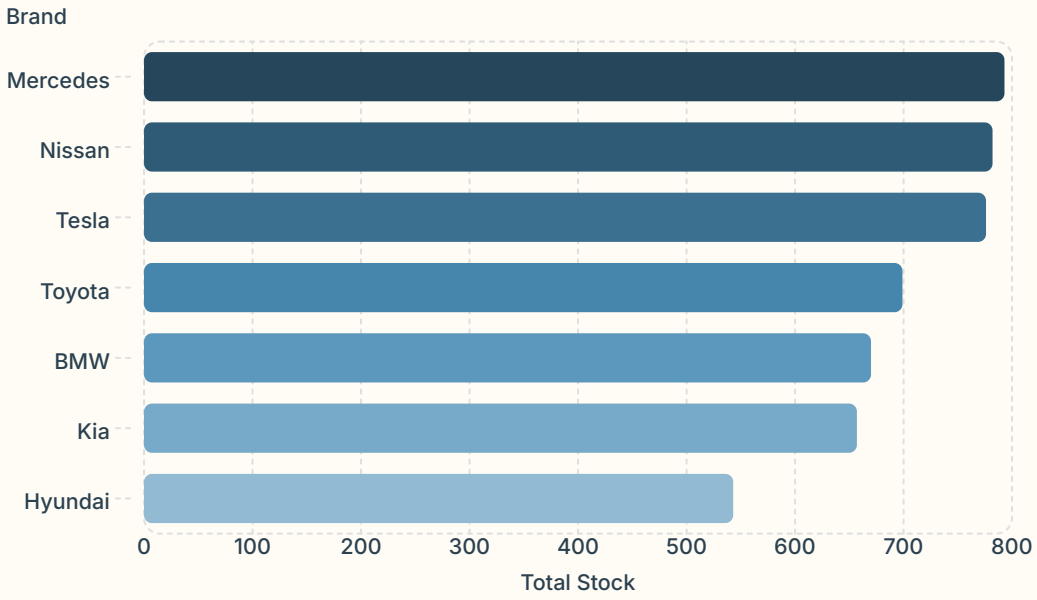


Pre-Analysis Steps

- Removed NULL rows across all columns
- Filtered blank/empty string entries
- Applied TRIM() for whitespace cleanup
- Verified numeric data types (Price, Year, Quantity)

Made with GAMMA

Brand Performance — Stock & Revenue



Key Findings

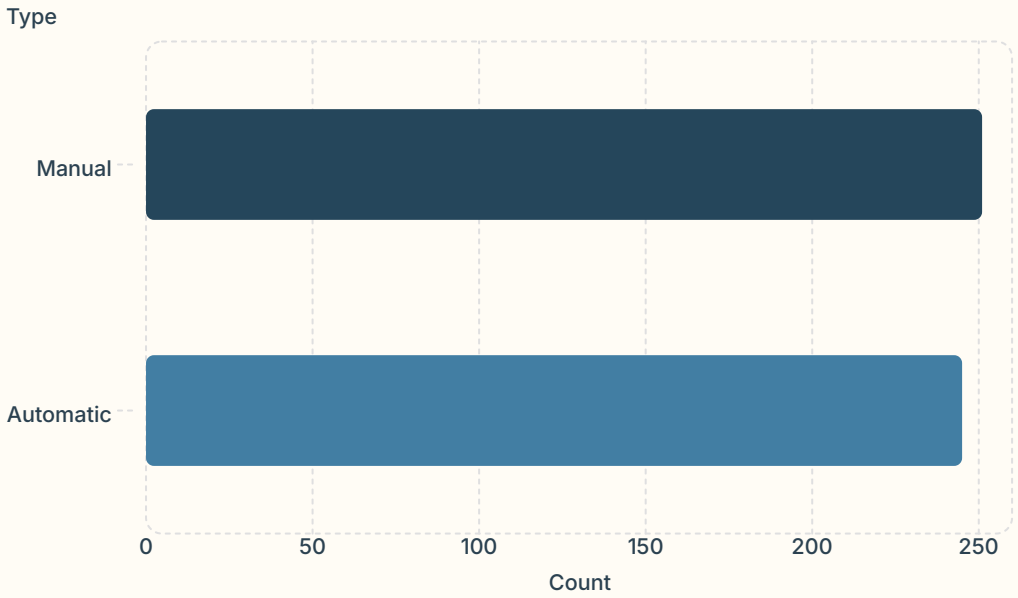
Mercedes leads with 793 units in stock and Rs. 472.8M in total sales revenue.

Hyundai has the lowest stock (543) and lowest revenue (Rs. 352.6M).

Mercedes dominates both inventory and revenue — top-performing brand.

Made with GAMMA

Transmission & Car Status



Transmission Split

Manual (251) vs Automatic (245) — nearly a **50-50 market split**.

Inventory Status

Healthy demand across all statuses.

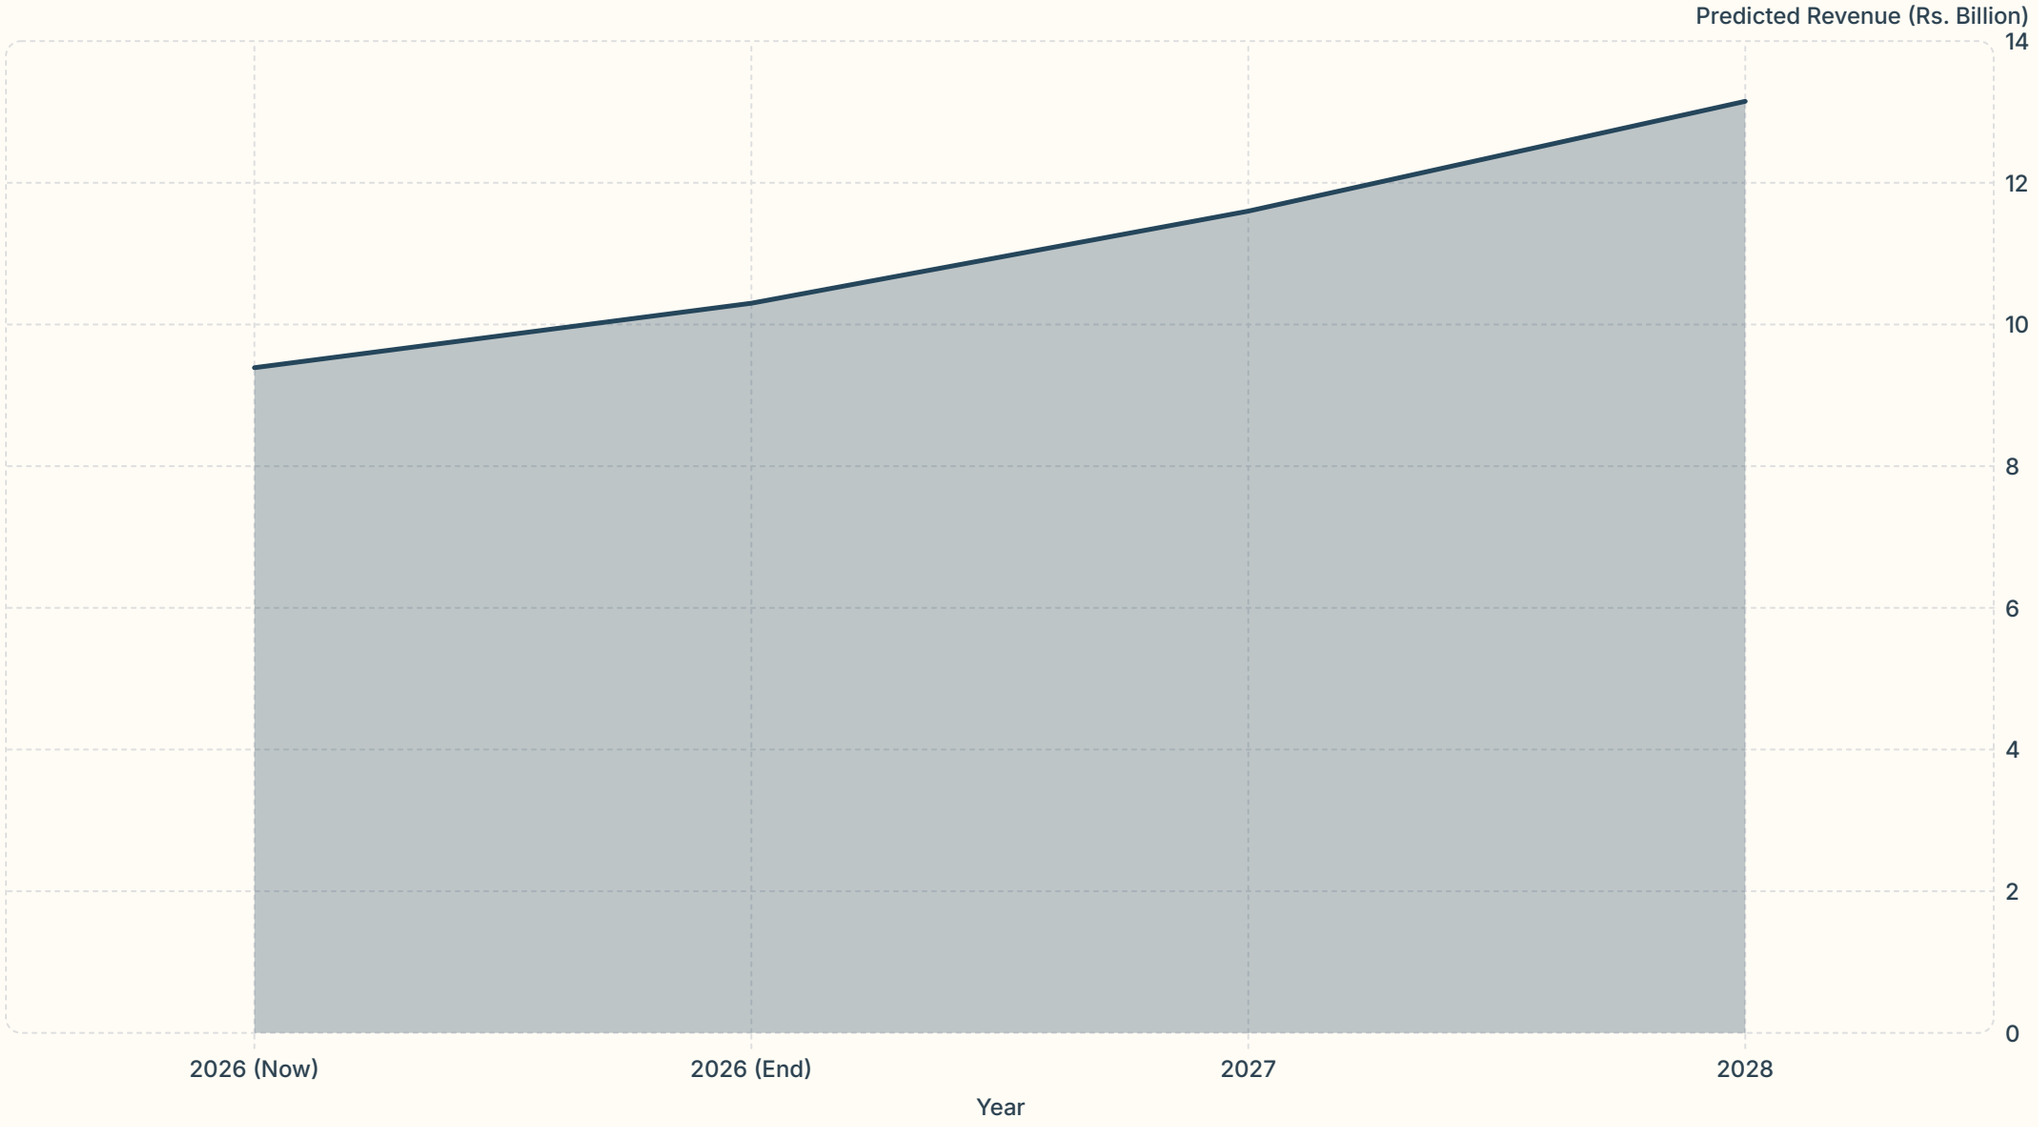
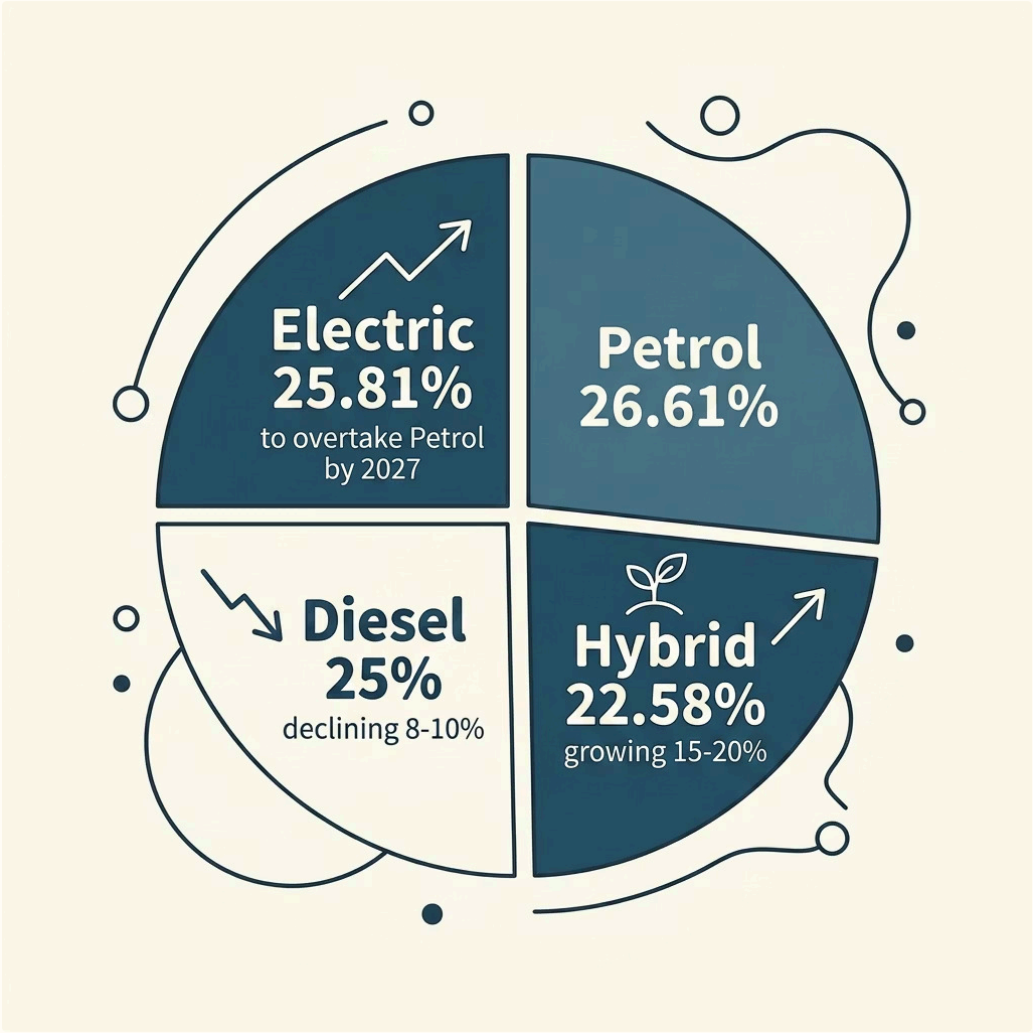
Revenue Forecast 2026–2028



Recovery and growth expected from 2025 onwards. Cyclical peaks in 2018 & 2022; dips in 2016, 2020, 2024.

Made with GAMMA

Engine & Brand Predictions



Brand Outlook

Tesla — Top revenue brand by 2027 (EV surge)

Mercedes — Premium dominance, 8–10% annual growth

Hyundai — Needs inventory boost; budget EV recovery by 2027

Nissan & Toyota — Stable, 5–7% annual growth

Made with GAMMA

Key Recommendations

Expand EV Inventory

Increase Tesla & Electric stock — demand peaks by 2027

Reduce Diesel

Cut procurement 20–30% due to declining demand

Boost Hyundai

Focus marketing on budget segment potential

Loyalty Program

Convert 156 Reserved cars to Sold faster
